

To whom it may concern,
XM Radio is well within their right to broadcast Traffic & Weather. SO LONG AS
THEY BROADCAST NATIONALLY, NOT JUST TO ONE LOCAL.
Please do not disrupt a service I use when traveling across the US.
It is feasible that many, including truckers, use more than just their home
city's traffic service.

The weather alerts, particularly tornado, may save lives to those like me who
don't know the local station numbers across America.

Freedom, please.

Thanks,
Jim Britton
